FLEET MANAGEMENT JUST GOT SMARTER

KEEP TRACK OF YOUR FLEET 24/7

BELL

Managing your fleet Maximizing your productivity

Shift Period	Equipment	Operator	Hours	Production	Efficiency	Idle	Break	Start	End
BELL TEST UNIT 1	Operator 1	80174	13.0	2112	85.0%	1.00	1.00	07:00	19:00
BELL TEST UNIT 2	Operator 2	80175	12.0	1980	80.0%	1.00	1.00	07:00	19:00
BELL TEST UNIT 3	Operator 3	80176	11.0	1850	75.0%	1.00	1.00	07:00	19:00

Today's business is fast paced and the bottom-line is where it counts. No one understands your business better than Bell Equipment. The cornerstone of our company is to provide the lowest cost per tonne equipment solutions and give added value to our customers. That's why we've used the latest technology to provide you with Bell Fleetm@tic II, the ultimate telematics system tool. It's designed to be your eyes at the worksite so that you can keep your finger on the pulse of your operation.

Accurate production information at your call whenever you need it gives you greater control of your fleet, allowing you to plan effectively and make better business decisions.

Simply invaluable

The beauty of Fleetm@tic II is that it's simple to use. Keep an eye on your machine via the website from the comfort of your home, office or even while travelling abroad.

The cutting edge Fleetm@tic II technology keeps Bell owners in touch with their equipment at all times. It provides accurate up-to-date operational data, production data, fault data as well as the machine's location and movements in a cost-effective and effortless manner.

Know the location of your machine; how much time has it spent idling; how many times it was loaded as well as how many tonnes it has moved; whether the operator is working carefully and efficiently and how many times the alarm has sounded.

Fleetm@tic II is designed to take the headache out of fleet management:

- machine abuse
- schedule periodic maintenance
- troubleshooting
- Increase your resale value with a documented machine history
- maximise your machine and operator utilization, and
- optimise your business
- manage your fleet from a central point
- track any unauthorised use or rental

Technology working for you around the clock

Communication is the key. A state-of-the-art GPS and data transmitter/receiver unit is fitted into the cab of your ADT and has been integrated with the truck's CANBUS system. Behind the scenes this onboard GPS receiver calculates the ADT's position from orbiting GPS satellites. Data about the position, production and machine is then quietly and effectively stored on the onboard memory module.

Easy and automatic

Accessing information from the truck's onboard memory module is easy and automatic. Data is sent to the Bell Fleetm@tic II server via the service provider's base station and processed into useful production and performance statistics. This data is accessible via the Bell Fleetm@tic II website. Each user is given a confidential ID and password with which to access their own secure website.

All you need is your computer and an internet connection to log in and access your list of Fleetm@tic II-enabled machines. You will also see an interactive map showing their exact locations and you will be able to zoom into the worksite within several metres.

The reporting possibilities are almost endless. You can request various daily, weekly and monthly, unit and fleet reports to be automatically sent. Apart from generating online reports, you can also set-up your reporting system to email customised reports to you at your choice of interval.

Tailor-made packages to meet your needs

Each new Bell Articulated Dump Truck (ADT) is equipped with the Bell Fleetmatic LITE package, designed to provide you with an automated report each day which includes the following; machine hours, location and average fuel burn.

However, Bell realises that no two businesses are the same. For that reason Fleetm@tic II has three additional packages available to customers for a subscription cost in order to meet your specific requirements. It's all about choice and how detailed you would like your report to be – whether it be daily, per shift or even almost to the minute with the Max Plus package. On the packages users will also be able to track their fleet on a secure website.

Fleetm@tic LITE

All Mark VI ADTs are equipped with our LITE package, free of charge, with an automated report each day which includes:

- Machine hours
- Shift hours
- Average fuel burn

Fleetm@tic STANDARD

24 Hour shift report. Includes the following:

- Machine hours
- Hours worked in shift
- Total tonnes moved
- Cycle time
- Time bar
- Average fuel burn
- Secure website fleet tracking

Fleetm@tic MAX

Same offering as STANDARD package, plus:

- Up to three individual shifts with user defined start times
- End of shift operator with expiry dates linked to each operator
- 10 Events per day
- SMS to mobile user

Fleetm@tic MAX PLUS

Same as MAX package, plus:

- Individual tipping reports with coordinates for each loading and tipping

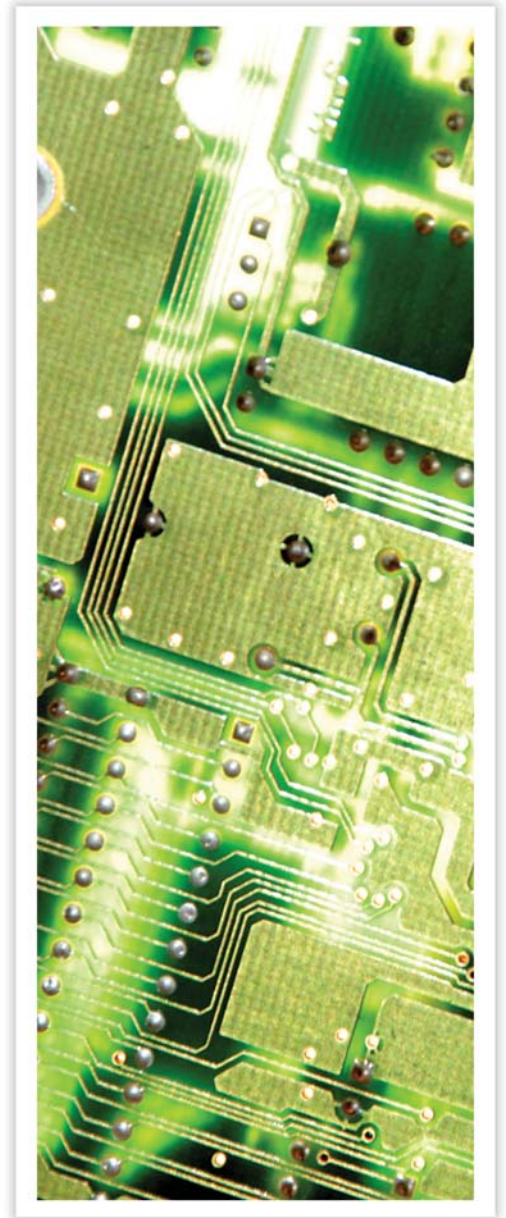

One service provider Truly global coverage

Bell Fleetm@tic II boasts superior transceiver technology with a service provider, that supplies accurate global coverage. This gives Bell Equipment and our customers truly global coverage with one of the leading fleet management systems in the industry.

Join the Bell Fleetm@tic family

Fleetm@tic II can be retrofitted to all D-series ADTs, Mark IV machines and later models. It is a standard feature on the Mark VI trucks. All Fleetm@tic II packages will be enhanced and upgraded periodically to give you the latest monitoring features.

To subscribe and enjoy the benefits of Fleetm@tic II contact your local Bell Equipment Customer Service Centre or dealer who will have subscription forms and the local subscription pricing. Call +27(0)35 9079538 or 080FTMATIC/0803862842 (toll free number for South Africa only) or alternatively email us on fleetmatic@bell.co.za

Whether it's fine-tuning your ADT productivity, monitoring the technical well-being of your trucks or policing for losses, Bell Fleetm@tic II is there to meet your needs, efficiently and economically.

With a secure website you can watch your machines working from anywhere – office, home or away. Depending on your need and budget choose from four levels of Fleetm@tic II; Lite, Standard, Max or Max Plus giving management down to the day, shift or load cycle respectively.

You can generate truck or fleet reports on your secure website, or just wait for your own custom spreadsheet reports to be emailed to you.

Either way, Bell Fleetm@tic II will save you time and money, while protecting your investments.
